

INTERVIEW SUMMARY

The Applicant appreciates that Examiner Jason Lin and Supervisor Brian Pendelton allocated time to speak to the Applicant's representative on November 14, 2007. The interview of November 14, 2007 was conducted over the telephone.

During the telephone interview on the aforementioned date, the rejections of the independent claims 1, 9, 25 and 32 were discussed. Without conceding the propriety of the Office's rejections, Applicant's attorney proposed amending representative claim 1 to recite that "the EPG is configured to form one or more events in response to user interaction with one or more said representations, wherein the one or more events are based on information other than application identification information originating from the server."

After discussing the claims of the Application and the cited Jerding references, Applicants understood the Examiners to agree that the claims as amended are at least allowable over the references of record. The Examiners indicated that they would update their search.

Applicant herein amends each of the independent claims along the lines of representative claim 1 discussed during the interview.
